Summary

Bilingual Software Engineer / Full Stack Developer (Arabic native, English professional) with 2+ years of experience building and enhancing scalable mobile, web, and enterprise applications. Skilled in Flutter, Laravel, ASP.NET, REST APIs, and UI/UX-driven development, with hands-on experience in performance optimization, payment integrations, e-commerce systems, and third-party services such as Google Maps and Firebase. Proven ability to improve system responsiveness, optimize user journeys, and deliver reliable digital solutions that support real business growth. Passionate about clean architecture, maintainable code, and building products that are both technically strong and user-centered.

Experience

Software Engineer

11/2025 – Present

Daob Information Technology

Jeddah, Saudi Arabia

- Designed and developed Daob's full multi-page corporate website using **Laravel**, covering brand presence, product positioning, reports, payment solutions, blogs, and contact flows, while introducing an **interactive in-browser product demo** that strengthened **SEO** visibility, user engagement, and new client acquisition.
- Built and enhanced core **Flutter** application, optimizing to improve app **responsiveness** by up to **45%** and **reduce latency** by **50%**.
- Transformed static application flows into **dynamic**, refined key **UI/UX**, improving usability and task completion **efficiency** by **35%–40%**.
- Integrated and optimized payment workflows across **Tamara**, **Tabby**, and **MyFatoorah**, resolving checkout and **transaction issues** and improving payment **reliability** by approximately **30%–35%**.
- Contributed to the integration of **third-party APIs**, including **Google Maps** for location-aware services, and **Firebase** push notification.
- Built and scaled a full **in-app e-commerce experience**, expanding the platform's capabilities and driving feature growth by **40%** since launch.
- Diagnosed and resolved production issues across mobile and connected systems, reducing recurring **bugs** by **approximately 45%** while supporting stable releases on the **iOS App Store** and **Google Play Store**.
- Refined ordering flows, including more **dynamic** product **logic** and user journeys, to **improve engagement**, retention, and overall experience.

Web Developer

07/2024 – 06/2025

Gaia Marketing Solutions

Jeddah, Saudi Arabia

- Contributed to the maintenance and enhancement of **PHP-MySQL** web applications, supporting business through clean and scalable code.
- Improved backend **performance** by assisting in query optimization and database indexing, reduce **response** times by **15%–20%** for modules.
- Built **10+** responsive UI components following modern **UX** principles and **WCAG** standards, ensuring **100%** cross-browser **compatibility**.
- Assisted in database refinements and system **debugging**, ensuring data **integrity** and overall system **stability** during the development lifecycle.
- Gained hands-on experience in collaborative **Git** workflows and **Agile** environments, contributing to a **20%** increase in team **deployment**.

Education

Bachelor of Software Engineering

GPA: **94.2** / 100

02/2021 – 07/2025

Applied Science University

8x Honor List Recipient

Amman, Jordan

- Key Course Work (Scores out of 100): Structured Programming (**100** / 100), Object Oriented Programming [I - II] (**100** / 100), Data Structure and Algorithms (**97** / 100), Database -Data Administration (**97** / 100), Web Development [Backend – Frontend] (**100** / 100)

Skills

- Languages:** Arabic (Native), English (Professional)
- Programming & Development:** Dart, PHP, C#, JavaScript, Python, Java, C++, HTML, CSS
- Frameworks & Technologies:** Flutter, Laravel, ASP.NET, REST APIs, Firebase, Google Maps Platform, Payment Gateway Integrations
- UI/UX & Design:** Figma, Canva, User Flow Design, Wireframing, Prototyping, UX Research
- Databases & Tools:** MySQL, SQL Server, Git, Postman, Power BI, Trello, JMeter, N8N, MS Office Suite
- Core Competencies:** Full Stack Development, Mobile App Development, System Architecture, API Integration, Performance Optimization, E-Commerce Solutions, Problem Solving, Agile Development, DevOps, Team Collaboration

Projects

Daob – Website (Overview Website + Interactive Demo) | [Link](#)

- Developed a **Laravel-based** corporate website and interactive product demo to improve **user engagement**, accessibility, and digital presence.

Academy Management System – (Freelance Project) | Not Deployed

- Developed **LMS** with **multi-role** system, **secure authentication**, and full **automation workflows**.

Code Lendo – AI-Powered Agentic Freelance Platform | [Link](#)

- Built full-stack **ASP.NET** platform with **AI integration** for freelancer workflow management and **quality assurance**.
